01. Air Curtains

PRODUCT DESCRIPTION:

An air curtain is an energy saving product that is used in commercial and residential buildings to prevent insects, dust and a wide range of other things from entering certain space.

Air curtain also ensure that the air in the building remain conditioned while also ensuring that spaces near the doors remain usable.

Why Use Air Curtains?

Incredible benefits can be achieved by using an air curtain. It controls air transfer, thus saving energy, enhances smooth and faster traffic flow, enhances the usability of spaces near doors and guaranteeing comfort.

Moreover, an air curtain gets rid of fog and ice in cold areas and improves safety in places near doors. Inhibits Mosquitoes, Flies and Dust.

04. PVC Strip Doors

PVC Strip door acts as a transparent door that can be put up in your industries and factories as a physical barrier between your actual work place and all the pollutants, insects and noise that exists outside of your workplace ! The efficiency of a PVC strip door is a combination of the width, thickness as the overlap of the pvc strips.

The PVC strip door has many applications and is a very useful product especially since it isolates noisy machinery, reduces air loss, reduces the movements of insects fumes, dust, etc. Depending on your specific requirement, there are different types of these strip doors.

05. PVC Soft Wall Curtains

PVC soft wall curtains are a multipurpose solution that can partition off work areas from a variety of elements including noise, odor, sounds, sight and other distractions that may inhibit or endanger workflow.

From clean room curtains for laboratories and high-tech manufacturing, to industrial PVC curtain walls for separating work spaces, to refrigeration curtains for energy efficient temperature and humidity control, we have a variety of industrial vinyl curtains that can be customized to fit the specifications you desire.

06. Window Blinds

Window Blinds are a great way to customize the look and feel of your windows. With our Window Blinds, you can choose from a variety of colors, textures, and styles to create a unique look for your home.

Besides adding privacy, insulating your house, and controlling the amount of light that enters, blinds provide a lot of functionality and are great for enhancing aesthetic appeal of your home or office.

07. Outdoor Blinds

As the name suggests, outdoor balcony blinds are types of blinds that are designed for covering balconies from the outside. These blinds are designed to cover the exterior of the building for preventing heat from getting in direct touch with terrace, balconies, etc.. These Outdoor blinds are also helpful in keeping heat and dust out of your home and maintaining a pleasant environment.

Using outdoor balcony blinds helps you keep heat out and cool air inside your indoor space. These are also good to block harmful sun rays from entering the premises of your home and thus give you full protection.

08. Floor Mat & Carpet Mat

A well-designed corporate mat creates a positive first impression, making guests feel welcome and appreciated. It sets the tone for the overall experience they'll have in your establishment.

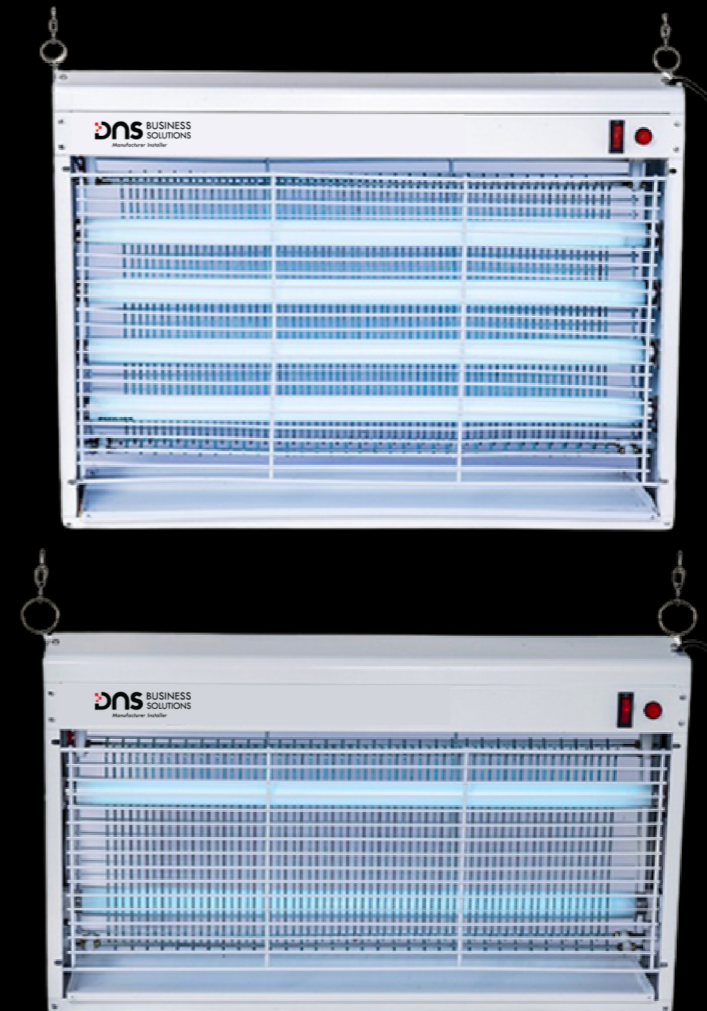

1. **Enhanced Safety:** Our floor mats are designed to prevent slips, trips, and falls, providing a secure walking surface even in wet or high-traffic areas. They help create a safer environment for employees, customers, and visitors.
2. **Dirt and Debris Control:** These mats effectively trap dirt, moisture, and debris at the entrance, preventing them from being tracked into your facility. This helps maintain cleanliness and hygiene throughout your space.
3. **Floor Protection:** By acting as a barrier between footwear and the floor, these mats safeguard your floors from scratches, scuffs, and stains, ultimately extending the life of your flooring investments.

09. Fly Insect Catchers

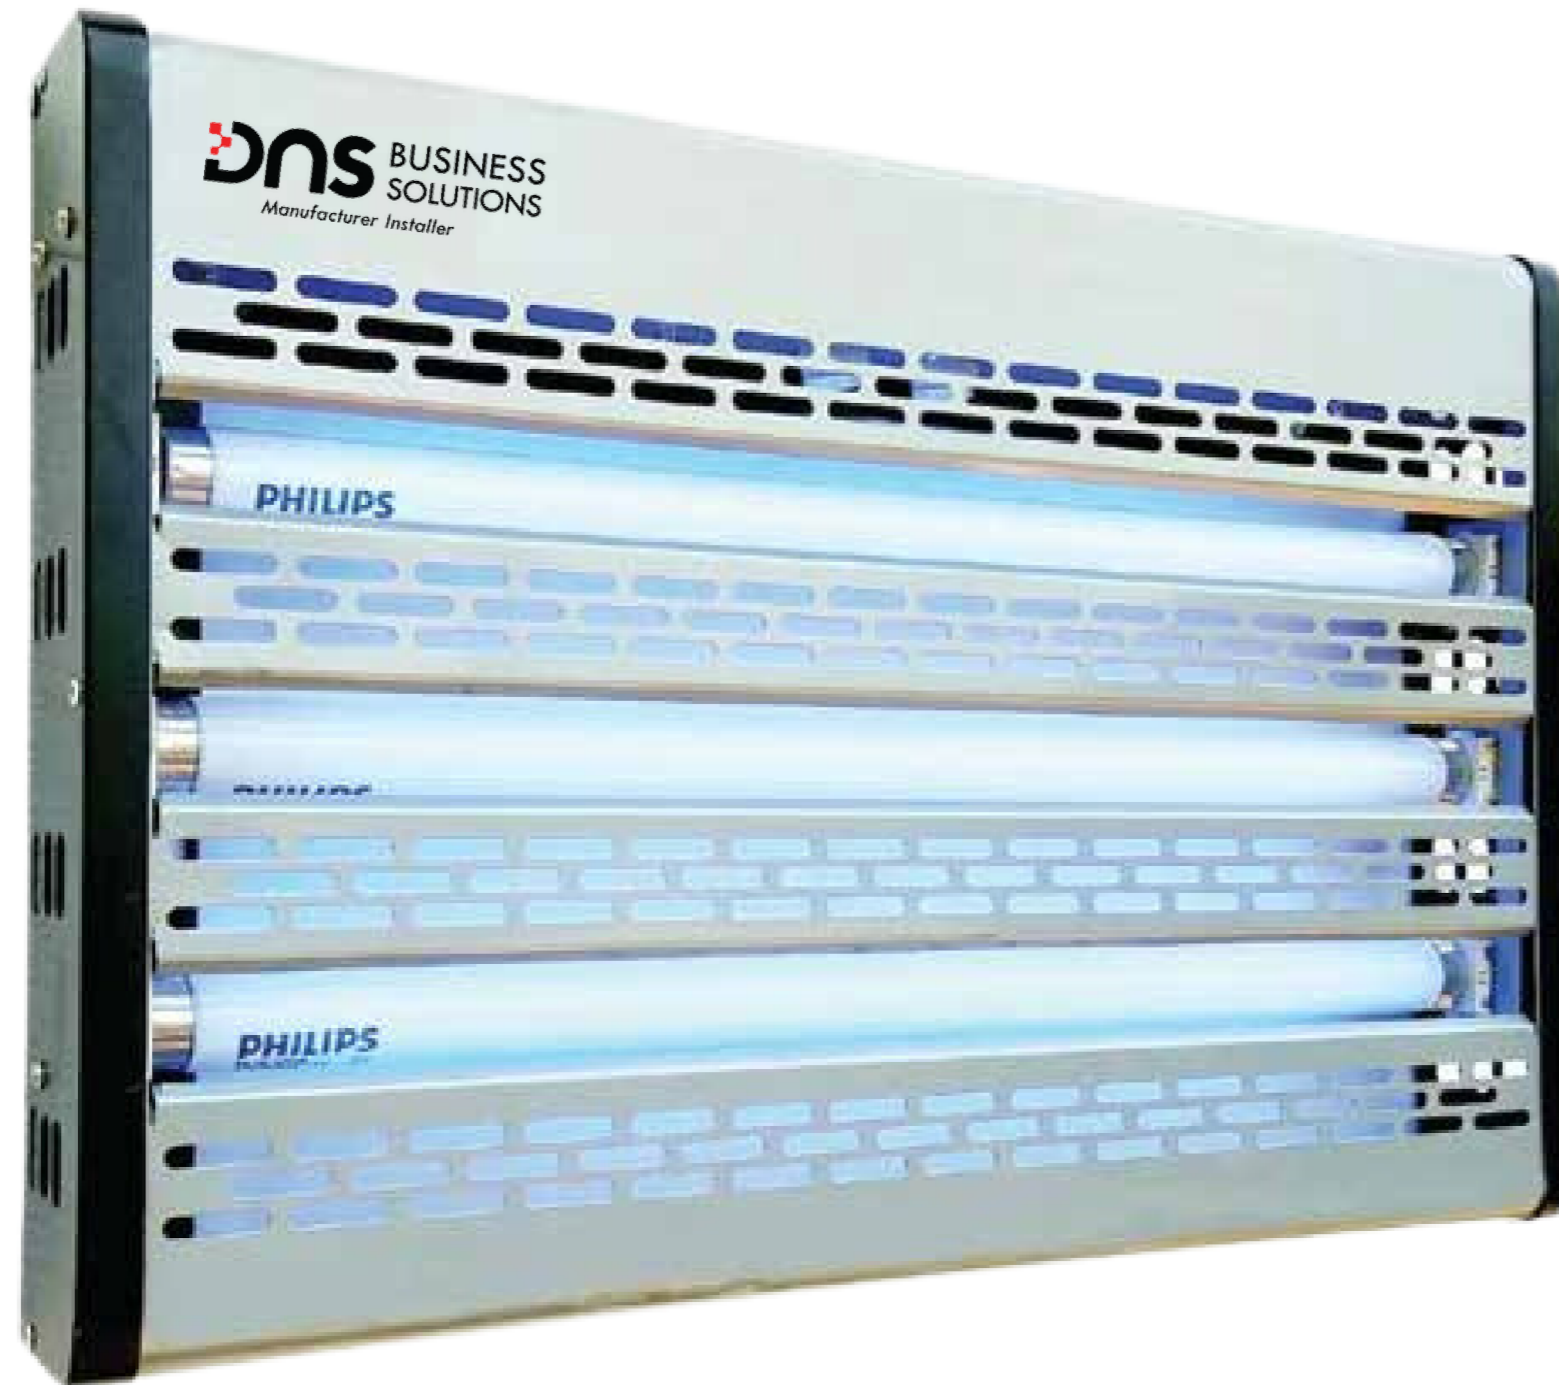

Fly insect Catchers are devices that eradicated mosquitoes, flies and other small insects.

The flying insects are attracted towards the tubes of the unit and dies immediately on the electrically charges grid. These dead insects are accumulated in the tray for easy disposal.

10. Glue Pad Fly Catcher

Glue Pad Fly Catcher is the safest way to remove flies and other in-sects from your premises.

The power of direct UV light expo-sure attract flies. Once the flies hover around the unit, they are trapped on the glue that is located behind the UV light. The Glue fly-Trap is economical, easy to main-tain and discreet.
